

AGRONOMY & AGRICULTURE

Consulting, Survey, Services

OUR EXPERTISE

- Agronomy,
- Agro-ecology
- Agro-machinery
- Applied pedology
- Hydrogeochemistry, hydrology
- Food, behavior & animal welfare
- Animal and plant genetics
- Biology & physico-chemistry of soil & water
- Ecology & biodiversity
- Phytopathology
- Phytoremediation
- GIS mapping
- Territory development

OUR TOOLS

From the laboratory to the field.
Greenhouses, mesocosms, micro plots and plots :

- 2 experimental farms (polyculture in beef cattle breeding, polyculture in dairy cattle farming), a poultry platform & an experimental station (Containment S1 to S3)
- Platforms dedicated to agroecology
 - Environment, soil, water, organic matter
 - Agrosience, nutrition and plant health
 - Agrobiodiversity, molecules and microorganisms
- 2 Innovation & Transfer Centers
 - AgriLab, collaborative innovation for agriculture
 - AgroRTech, innovation «agro-resources & transformations»

Document non contractuel - Conception UniLaSalle DCOM - 20210310PRESTAEN

Among our offers :

Soil studies
Diagnosis and design of innovative cropping systems
Livestock & nutrition advice
Determination of weeds and soil fauna
Biocontrol & bio-stimulation efficiency tests
Microbiology & agronomic performances

Bioindicators, management of agrosystems & ecosystems
Ecological engineering
Territorial & prospective study
